

# Benefits of clay bricks

Clay bricks don't need paint, sealing or any other treatments to maintain their aesthetics and durability. The colour is fired into the bricks so it lasts a lifetime and will not fade. They are cost effective and low maintenance.

Brick insulates in a way most materials do not. By following energy efficient design principles and combining bricks with insulation, your home will keep warm in winter and cool in summer, so you'll love coming home.

Clay bricks are a sustainable building option. Made from organic minerals found in naturally abundant sources of clay, clay brick's long-lasting life cycle offers ongoing environmental and health benefits. Durable, re-usable, free from contaminants and naturally resistant to pests or fire, clay brick is safe to live in, making it the ultimate material in responsible and economical home building design.
